

Do you want to be part of the dynamic and multicultural team behind the .eu and .europa top level domains? Then send your CV today!

EURid is the not-for-profit organization appointed by the European Commission to operate the .eu and .europa top-level domains. The .eu domain ranks among the ten largest top-level domains in the world, connecting 500 million people in 31 countries to one Internet identity.

EURid is headquartered in Belgium (Diegem), and has satellite offices in Sweden, the Czech Republic and Italy. Our young organization employs people from all over the European Union and is the perfect arena for self-motivated professionals looking to be challenged and stimulated in their working environment.

For our office in Diegem, we are currently looking for a:

Operations & Security Support Engineer

Description:

As an Operations & Security Support Engineer, you will be part of the SOC/NOC team responsible for the design, implementation and maintenance of the network security systems of EURid.

Your main tasks and responsibilities will include:

- Identify problems and errors prior to or when they occur and log all such incidents in a timely manner with the required level of detail
- Investigate tickets and identify the root cause of incidents and problems
- Manage, configure and deploy Network Security related systems, Network Security appliances and associated management software;
- Deploy, configure and maintain networking devices and associated management software;
- Configure and Maintain Host Based Intrusion Detection and/or Prevention Systems (H-IDS/H-IPS);
- Configure and Maintain On-line Vulnerability Management Systems (Online VM);
- Configure and Maintain Full Packet Capture (FPC) devices;
- Configure and Maintain Network Based Intrusion Detection and/or Prevention Systems (NIIDS/NIPS);
- Participate in a 24/7 on-call system

Profile:

- Bachelor degree in computer science or equivalent by experience
- Relevant work experience of at least 3 years as an operations and security engineer
- Hands-on management of infrastructure solutions
- Linux system level (Red Hat-based) and network analysis
- Experience with Configuration Management and Automation Tools like Ansible, Puppet
- Experience in the management, configuration and deployment of Network Security related systems, Network Security appliances and associated management software
- Experience in the deployment, configuration and maintenance of networking devices and associated management software
- Experience in Communication and Information System (CIS) security knowledge, which includes, but not limited to, business continuity, computer forensics, network security, incident management, end user device security guidance, and training / new equipment implementation guides;
- Knowledge of cyber security approaches and systems for detection of malicious activity;
- Knowledge of cyber security approaches and systems for prevention and mitigation of malicious activity;
- Fluent in English and either Dutch or French
- Bonus :
 - Experience in a SOC/NOC team

What we offer: EURid offers you a challenging job in a young, dynamic and international environment. Please send your details or contact us for more info via [jobs\[at\]eurid\[dot\]eu](mailto:jobs[at]eurid[dot]eu).
