

EURid is the not-for-profit organization appointed by the European Commission to operate the .eu, .eu (in Cyrillic) and .eu (in Greek) top-level domains. The .eu domain ranks among the ten largest top-level domains in the world and almost 4 million .eu names have been registered since the domain opened for registration in 2005.

Our mission is:

- to promote the .eu TLD across the European Union and the third countries;
- to organize, administer and manage the .eu TLD in the general public interest and ensure in all aspects of the administration and management of the .eu TLD, high quality, transparency, security, stability, predictability, reliability, accessibility, efficiency, non-discrimination, fair conditions of competition and consumer protection.

EURid is headquartered in Belgium (Diegem), and has satellite offices in the Czech Republic, Italy and Sweden. Our young organization employs people from all over the European Union and is the perfect arena for self-motivated professionals looking to be challenged and stimulated in their working environment.

Do you want to be part of the dynamic and multicultural team behind the .eu / .eu / .eu top-level domains? Then send your CV today!

For our office in Diegem we are currently looking for a:

Senior Java Developer

Description:

EURid designs and builds its own registration system software, which is open for business on the Internet 24 hours a day running on in-house maintained infrastructure in different datacenters across Europe and servers around the world.

As a Senior Java Developer, you will be responsible to translate the business requirements into quality software applications by applying your in-depth knowledge of application design and Java frameworks.

You will work on an internet service with a **cutting-edge development stack**.

Your main tasks and responsibilities will include:

- Capture and analyze the business requirements
- Implement the business requirements into a sound technical solution
- Maintain and evolve the software architecture
- Testing and bug fixing
- Code review and maintenance

Profile:

- Master degree in computer science or equivalent by experience
- Relevant work experience of more than 8 years as a Java developer
- In-depth knowledge of Java technology
- Experience in capturing complex business requirements
- Expertise in design and architecture of complex systems
- You are used to work in an Agile environment
- Experienced Linux user
- You stay on top of software development/architecture trends and new best practices
- Team-player, but able to work independently
- Fluent in English (all internal communication and documentation is in English). Knowledge of Dutch or French is a plus.
