Do you want to be part of the dynamic and multicultural team behind the .eu and .ею top-level domains? Then send your CV today!

EURid is the not-for-profit organization appointed by the European Commission to operate the .eu, .ею, and .ευ top-level domains. The .eu domain ranks among the ten largest top-level domains in the world, connecting 500 million people in 31 countries to one Internet identity.

EURid is headquartered in Belgium (Diegem), and has satellite offices in Sweden, the Czech Republic, and Italy. Our young organization employs people from all over the European Union and is the perfect arena for self-motivated professionals looking to be challenged and stimulated in their working environment.

For our office in Diegem, we are currently looking for a:

Systems Engineer

Description:

As a System Engineer, you will be responsible for the design, implementation, and maintenance of IT services at EURid

Your main tasks and responsibilities will include:

- Improve the lifecycle of services, from design to operation
- Focus on optimizing existing services, building infrastructure, ensuring idempotency and eliminating work through automation
- Maintain services and improve service uptime and performance by measuring and monitoring
- Participate in a 24/7 on-call system

Profile:

Minimum qualifications:

- Experience in the fields of Computer Science or Software Engineering of a minimum 3 years
- Experience programming in at least one of the following languages: C, C++, Java, Python, Go.
- Experience with Unix/Linux operating systems
- Experience in analyzing and troubleshooting systems
- Demonstrate energy, effort and enthusiasm for delivery and results
- Be able to see the big picture of how systems and services relate to each other

Preferred qualifications:

- Bachelor's degree in Computer Science or a related technical field involving systems engineering
- Experience in designing and developing software-oriented solutions towards systems or network automation
- Ability to debug, optimize code, and automate repetitive tasks
- Systematic problem-solving approach, coupled with effective communication skills and seeking continuous improvement
- Familiar with Continuous Delivery/Deployment
- Familiar with Automation Tools
- Working across multiple teams to deliver the final product
- Being able to see the 'big picture' and understand the business
- Fluent in English and either Dutch or French

What we offer:

EURid offers you a challenging job in a highly technical and international environment. You will be part of a young and dynamic team. Please send your details or contact us for more info via jobs[at]eurid[dot]eu.
